# USAGE

## ***POSITIONING***

THE MAGICO V3 LOUDSPEAKERS ARE A PRECISION INSTRUMENT FOR MUSIC REPRODUCTION. AS SUCH, PROPER CARE AND ATTENTION TO DETAIL WHEN SETTING UP THESE SPEAKERS WILL ALLOW YOU TO ACHIEVE THE MAXIMUM PERFORMANCE FROM THEM. FOLLOWING THESE SET-UP GUIDELINES WILL MAKE SURE THE SPEAKERS ARE PROPERLY POSITIONED TO DELIVER THE OPTIMUM LISTENING EXPERIENCE.

- THE SPEAKERS AND THE LISTENER SHOULD FORM AN ISOSCELES TRIANGLE.
- THE LISTENER SHOULD BE EXACTLY EQUIDISTANT BETWEEN THE TWO LOUDSPEAKERS. THE BEST WAY TO DETERMINE THIS IS WITH A PIECE OF STRING. PICK A FIXED SPOT AT THE LISTENING POSITION. RUN THE STRING FROM THIS SPOT TO THE TIP OF THE TWEETER OF THE LEFT SPEAKER. REPEAT THE PROCESS FOR THE RIGHT SPEAKER. IT IS CRITICALLY IMPORTANT TO KEEP THIS DISTANCE PRECISELY THE SAME.
- **TOE-IN.** WE RECOMMEND PICKING A SPOT 1 – 2 FEET BEHIND THE LISTENER AS A FIXED ON-AXIS REFERENCE POINT.

## ***CONNECTIONS***

ALL CONNECTIONS SHOULD BE MADE WITH ALL ELECTRONIC EQUIPMENT (AMPLIFIERS, PREAMPLIFIERS) TURNED OFF. THERE ARE TWO TERMINALS AT THE BACK OF THE SPEAKER. THE TERMINALS ARE INSULATED TO ACCEPT A VARIETY OF CABLE TERMINATIONS FOR MOST APPLICATIONS AND TO PREVENT ANY LIKELIHOOD OF ELECTRICAL SHOCK, EVEN WHEN THE SPEAKERS ARE USED WITH THE HIGHEST POWERED AMPLIFIERS. **DO NOT** USE TOOLS TO TIGHTEN THE BINDING POSTS.

## ***BREAK-IN***

A LOUDSPEAKER IS A MECHANICAL DEVICE AND AS SUCH REQUIRES AN EXTENDED INITIAL PERIOD OF NORMAL USE DURING WHICH A NOTICEABLE IMPROVEMENT IN SOUND QUALITY WILL OCCUR. **DO NOT** ATTEMPT TO ACCELERATE THE BREAK-IN PROCESS BY PLAYING SINE WAVES, TONE SWEEPS, BREAK-IN CDS OF ANY SORT, OR OTHER GENERATED SIGNALS.

**CARE**

FOR WOOD ENCLOSURES, OCCASIONALLY USE A SOFT, DRY CLOTH TO WIPE OFF DUST. FOR ALUMINUM PANELS USE A LINT-FREE SOFT CLOTH (PROVIDED IN ACCESSORY KIT), DAMPENED ONLY WITH WARM, SLIGHTLY SOAPY WATER (A SMALL DROP OF DISH SOAP WILL DO). **DO NOT** USE CLEANERS THAT CONTAIN AMMONIA, STRONG SOLVENTS, OR ABRASIVE MATERIALS. USE OF THESE CLEANERS CAN DEGRADE, SCRATCH, OR DESTROY THE FINISH.

## V3 Hex Bolt Tightening Procedure

To keep your Magico V3s performing at their best, the V3 hex bolts on the front baffle should be tightened periodically, just like you would tighten woofer screws. It is a very simple procedure to tighten the bolts. All that is required is a 3/16" hex wrench. You will notice in the image and on your V3s that from top to bottom there are 6 rows of bolts. Except for the second pair from the top, all other bolts should be tightened very securely using only the hex wrench. The second row of bolts should be tightened firmly, or simply finger tight. Following this procedure on a regular basis will insure that your V3s will always deliver optimum performance. Bolts should be tightened to a maximum of 11 newton-meters.
